

CAMILLA GIBELLI

Fashion Designer

📍 Milan, Italy

PROFILE

I am a Fashion Designer, a recent graduate from IED Milano in July 2024, with a strong focus on innovative and adaptive design. I specialize in 3D fashion creation using tools like CLO3D, Adobe Sampler & Substance, and Blender. My design approach combines aesthetics with functionality, aiming to create pieces that are inclusive and sustainable, pushing the boundaries of traditional fashion design. Throughout my academic journey, I have honed my ability to develop fashion solutions that are both inclusive and sustainable. I have collaborated with industry partners on projects that required creativity, technical skills and problem-solving, focusing on creating garments that cater to diverse needs while maintaining a strong sense of style. This hands-on experience has deepened my understanding of the importance of user-centered design and reinforced my commitment to crafting pieces that can make a real impact. I am now seeking for an internship in the fashion industry to gain broader experience, further develop my skills across a range of activities, and contribute to impactful design solutions.
